**FIG. 15B**

A perspective view of the device 100 with the cover 110 tilted open. The device 100 is a rectangular box with a textured surface. The cover 110 is a flat rectangular plate that fits over the top of the device. It is shown in an open position, revealing the internal structure of the device, which includes a series of parallel ridges or channels. The cover 110 is attached to the device 100 via a hinge mechanism, which is visible as a series of small, rectangular protrusions along the edge of the cover.
